Re: Simplot Livestock Feedlot No. 3
NPDES Permit No. IDG-010027

Dear Sirs:

Enclosed is Simplot Livestock Company, Feedlot No. 3, Caldwell, Idaho, Notice of Intent for coverage by the general NPDES Permit for concentrated animal feeding operations in Idaho.

We have received two letters from the Seattle office, the first with incorrect forms for application and the second letter, with the applicable forms, was mailed and received after the required date for application.

If you should have any questions, please do not hesitate to contact Ron Parks at (208) 455-4834.

Sincerely,

Tom Basabe
President
Simplot Land & Livestock Group

Township 4 North
Range 3 West
Portions of the SE ¼ of Section 24
Township 4 North
Range 4 West
Canyon County, Idaho

Simplot Livestock Company Feedlot No. 3 has been closed. The pens and manure are being removed to reclaim the site for crop production. The feedlot was an unpaved, open, concentrated animal feeding operation and is located on approximately 324 acres. Confinement pens were constructed on a soil base and situated on flat terrain.

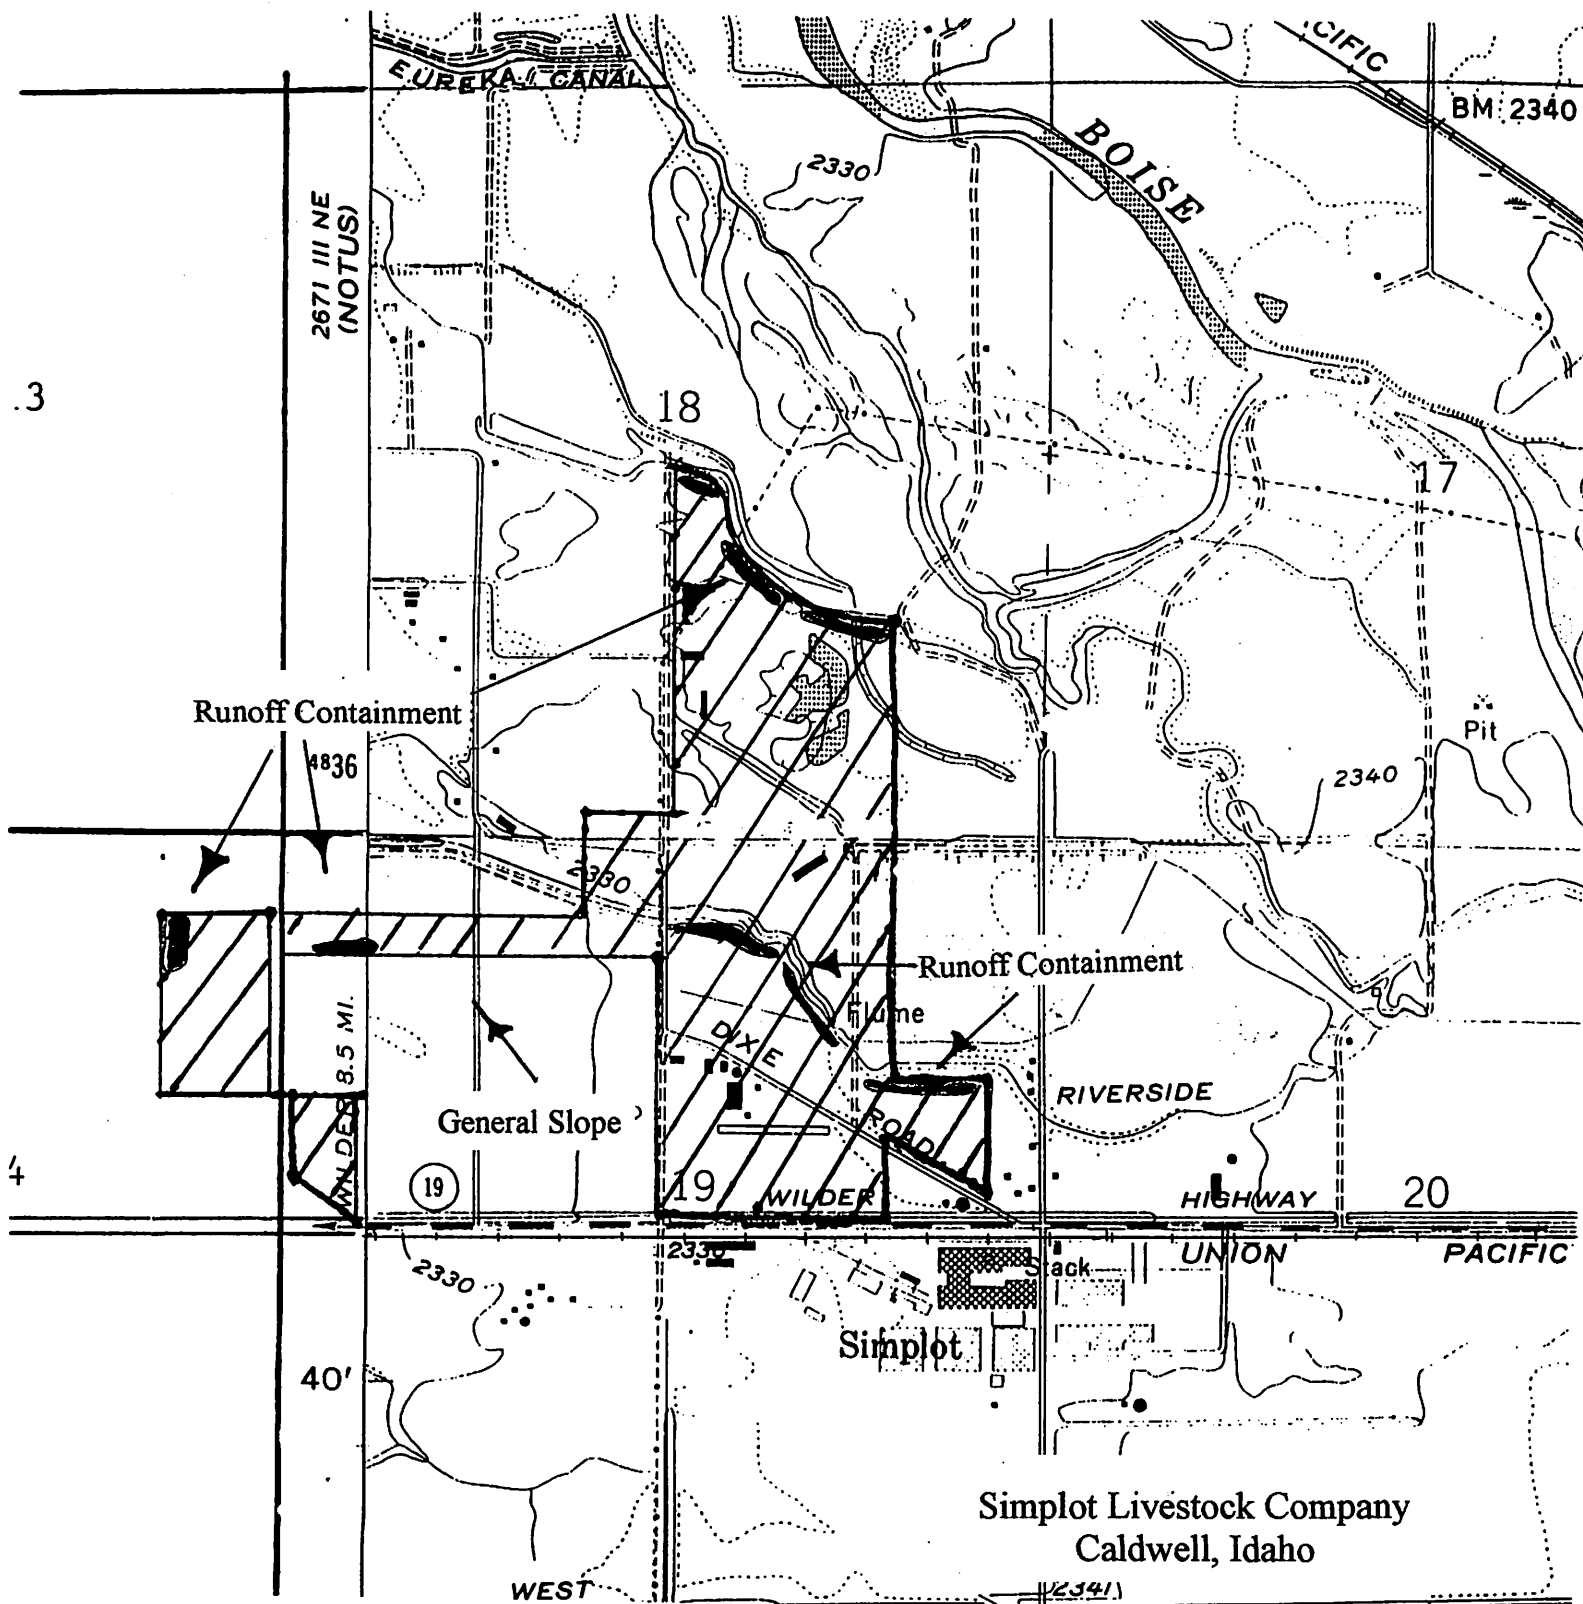

Run-off from rainfall or snowmelt events is collected within the pen area with any excess flowing to a series of storage ponds. All runoff is allowed to evaporate or applied at agronomic rates to surrounding Company owned farmland. Off site run-off is prevented from entering the site by natural or manmade barriers.

Manure located in the pens is being removed and applied at agronomic rates to surrounding Company owned farmland.

Riverside canal, South Drain, and the Boise River are the receiving waters that may be impacted with wastewaters from the facility if runoff is greater than the required and designed containment specifications.

Elevation	2,340 feet
Annual Rainfall	10.69 inches*
